

# GOVERNMENTAL

## Secure Power for Secure Facilities

### Since 1972, Alban Engine Power Systems

has provided specialized solutions to meet the most complex design specifications for Electric Power Generation [EPG]. Alban offers a full range of diesel and gas engines for standby and prime generator applications. We provide complete integrated solutions to solve your power needs. Our project teams include engineering, sales and service experts - each team dedicated to your industry.

**Alban's Governmental team** is experienced and equipped to provide product and service solutions for the power security demands of all local, state and national governmental entities. Alban Engine Power Systems is the clear choice for the best value in equipment and product support solutions. We set the standard for parts and service support, from extensive parts inventories to preventative maintenance, diagnostics, rental capabilities and emergency service.

#### Products

- Diesel Generator Sets: 5 kW to Over 10,000 kW
- Natural Gas Generator Sets: 8 kW to Over 3,500 kW
- UPS Systems: 15 kVA to Multi-Megawatt Solutions
- Cat Switchgear: 600 V to 15 kV
- Cat Automatic Transfer Switches (ATS): 40 to 4,000 Amps
- Enclosures, Racks & Accessories
- TVSS Systems
- SCADA Systems
- Emission Solutions

**Alban takes pride in what we sell. We prove it with our unmatched Product Support.**

**Service:** If a failure does occur, Alban, through our 24/7 Emergency Response Center, dispatches highly skilled responders from one of our 14 locations to bring the system back to operation quickly.

**Parts:** Supporting the service effort is the Alban parts system. The best in the business where 97% of all electric power systems parts are in local inventory, available the same day. The other 3% are generally available the next day through Caterpillar regional parts distribution centers.

**Rental:** For unexpected long term repairs, or to support your construction phasing requirements, Alban Rental Solutions offers a full line of mobile packaged generator sets and supporting auxiliaries (fuel tanks, cables, ATS, breakers etc).

**Preventative Maintenance:** Alban offers a comprehensive preventative maintenance program tailored to meet your demands. All this so your Emergency Power Supply System is ready for the next start and providing you the appropriate documentation to comply with all requirements.
