

HEALTHCARE

Your Rx for Reliable Power

Since 1972, Alban Engine Power Systems

has provided specialized solutions to meet the most complex design specifications for Electric Power Generation [EPG]. Alban offers a full range of diesel and gas engines for standby and prime generator applications. We provide complete integrated solutions to solve your power needs. Our project teams include engineering, sales and service experts - each team dedicated to your industry.

Alban's Healthcare team is experienced and equipped to provide product and service solutions for the critical power demands of the Healthcare and medical research industries. At Alban we recognize that in Healthcare operation of the Emergency Power Supply System [EPSS] could make the difference between life and death. Because of the critical nature of the industry and the stringent standards of JCAHO and NFPA, we have organized a team of experienced professionals to meet the unique needs of Healthcare facilities.

Products

- Diesel Generator Sets: 5 kW to Over 10,000 kW
- Natural Gas Generator Sets: 8 kW to Over 3,500 kW
- UPS Systems: 15 kVA to Multi-Megawatt Solutions
- Cat Switchgear: 600 V to 15 kV
- Cat Automatic Transfer Switches (ATS): 40 to 4,000 Amps
- Enclosures, Racks & Accessories
- TVSS Systems
- SCADA Systems
- Emission Solutions

Alban takes pride in what we sell. We prove it with our unmatched Product Support.

Service: If a failure does occur, Alban, through our 24/7 Emergency Response Center, dispatches highly skilled responders from one of our 14 locations to bring the system back to operation quickly.

Parts: Supporting the service effort is the Alban parts system. The best in the business where 97% of all electric power systems parts are in local inventory, available the same day. The other 3% are generally available the next day through Caterpillar regional parts distribution centers.

Rental: For unexpected long term repairs, or to support your construction phasing requirements, Alban Rental Solutions offers a full line of mobile packaged generator sets and supporting auxiliaries (fuel tanks, cables, ATS, breakers etc).

Preventative Maintenance: Alban offers a comprehensive preventative maintenance program tailored to meet your demands. All this so your EPSS is ready for the next start and providing you the appropriate documentation to comply with the requirements of JCAHO and NFPA.
